## Developer/Designer

I am a Frontend Developer with a talent for creating immersive interfaces using HTML, CSS, and React, with specialized expertise in Next.js. My approach blends technical prowess with creative finesse to deliver outstanding user experiences.

## WORK EXPERIENCE

### IMI Games • June 2022 – Present

#### Product Manager

- User Experience (UX) and Design – Enhanced user experience through strategic design improvements.
- Client Queries and Releases – Managed product releases and handled client inquiries.
- Cross-Functional Collaboration – Worked with various teams to achieve project goals.
- Agile Development – Led agile processes and sprint planning.

### ShoutOUT Labs • June 2018 – May 2022

#### Front End Engineer

- Front End Development & Responsive Design – Developed responsive web applications to ensure optimal performance on various devices.
- UI/UX Implementation & Integration – Translated wireframes into intuitive and beautiful user interfaces, enhancing user experience.
- Wireframing and Implementation – Worked from wireframing the product to improve user experience, building and implementing intuitive UIs to enhance platform performance.
